SUMMARY

AI engineer who designs and ships production GenAI products end-to-end. Built and deployed two live AI SaaS platforms solo — AdPilot India (async AI ad-campaign generation for Indian SMBs) and BOS SaaS (AI business operations) — owning schema design, backend, frontend, and multi-cloud deployment. Comfortable engineering real AI pipelines: job queues, credit metering, RBAC, and LLM orchestration over live databases. Years of hands-on evaluation across the AI tooling ecosystem inform pragmatic architecture choices.

TECHNICAL SKILLS

AI / LLM: OpenAI GPT-4o, LangChain, Prompt Engineering, RAG, FAISS, Embeddings, Vector Databases, Multi-provider LLM architecture (Claude, Gemini), n8n

Backend: Node.js, Express, Python, TypeScript, REST APIs, BullMQ, Redis, JWT Auth, Prisma ORM

Frontend: Next.js 14, React 18, TypeScript, Tailwind CSS, Zustand, TanStack Query, NextAuth.js, Shadcn/UI

Data / Infra: PostgreSQL, Supabase, SQLite, Upstash Redis, Vercel, Railway, Render, GitHub CI/CD, Sentry, Winston

AI EXPERIENCE

AI Engineer — AdPilot India

2026 – Present

Bangalore (Remote) • AI Marketing SaaS • Live in production

- Built and deployed AdPilot India solo — an AI marketing SaaS for Indian SMBs that generates complete Google/Meta ad campaigns from plain-language business descriptions in Hindi, Hinglish, or English using GPT-4o.
- Engineered an async AI job pipeline using BullMQ and Redis (Upstash) across 8 independent queues, with automatic retry, atomic credit deduction, and non-blocking server startup that survives Redis outages.
- Designed a 20+ table PostgreSQL schema (Supabase, Prisma ORM) spanning campaigns, ad groups, keywords, credits, subscriptions, billing, notifications, and audit logs, with soft deletes and pause-integer money handling.
- Built an India Intelligence Engine that detects upcoming festivals (Diwali, Holi, IPL, wedding season), applies budget multipliers, and adapts AI campaign strategy by city tier (Tier 1/2/3). Deployed a monorepo with shared TypeScript types across Vercel, Railway, Supabase, and Upstash with GitHub CI/CD. [Live](#) • [Code](#)

AI Engineer — BOS SaaS

Nov 2025 – Present

Bangalore (Remote) • AI Business Operating System • Live on Vercel

- Designed and shipped a full-stack AI SaaS combining CRM, task management, analytics, WhatsApp automation, and a natural-language AI assistant, with role-based access control (Admin/Manager/Staff).
- Built a LangChain + OpenAI assistant querying live PostgreSQL data in plain English, with scoped retrieval that cut response time from ~45s to ~4s. [Live](#) • [Demo](#) • [Code](#)

AI Automation Engineer — CareerSathi Advisory

Dec 2025 – Mar 2026

Bhopal (Remote) • Freelance

- Built n8n-based automated lead generation, capture, and follow-up workflows for an education consulting business, reducing manual effort through AI-driven client communication and lead nurturing.

ADDITIONAL PROJECTS

Multi-PDF AI Knowledge Base — RAG document QA pipeline ingesting multiple PDFs, chunking with overlap, embedding via OpenAI, and storing in FAISS for retrieval-augmented QA through LangChain's RetrievalQA chain. Python, LangChain, FAISS, Streamlit. [Code](#)

Real Estate AI Chatbot — LLM-driven lead-qualification bot capturing intent, budget, location, and timeline, adapting question flow based on prior answers. Python, LangChain, OpenAI, Streamlit. [Code](#)

AI ECOSYSTEM EXPOSURE

Extensive hands-on experience building with and evaluating the modern AI stack: coding and reasoning assistants (ChatGPT, Claude, Gemini, Cursor, GitHub Copilot, Windsurf, Replit AI, Blackbox AI), rapid app builders (Lovable, Bolt), generative media and research tools (Midjourney, Ideogram, Leonardo AI, Runway, ElevenLabs, Suno, Perplexity, NotebookLM), and orchestration frameworks (LangChain, n8n) — informing pragmatic model and architecture choices.

PREVIOUS PROFESSIONAL EXPERIENCE

Digital Marketing Associate — Bhuwan Industries

Jan 2024 – Sep 2025

- Managed Instagram & YouTube growth, product listings on Blinkit and rapid-delivery platforms, and Google/Instagram ad campaigns.

Business Development Executive — Propedge Realty

Mar 2023 – Jul 2023

- Converted leads to sales in Pune's housing market; ran lead generation via Housing.com, 99acres, and Meta ads.

E-Commerce Associate — ANS Commerce

Oct 2022 – Mar 2023

- Managed marketplace listings, competitor analysis, and account health across Amazon, Flipkart, and Myntra.

EDUCATION

BSc Mathematics — Barkatullah University, Bhopal

2015 – 2018
